

PAT INSPECTION. PRE INSPECTION CHECKLIST.

- List and send all appliances to be tested.
- All appliances to be tested must be in full working order prior to the test.
- We must have full access to the appliance plug in order to conduct the test.
- All appliances which need to be moved in order for the engineer to conduct the test must be done prior to the engineers visit. E.g. Washing machines pulled out, fridges and dishwashers moved.
- The engineer will not be responsible for moving large appliances.
- Limited test will be conducted on built in appliances.
- Limited test will be conducted on appliances with no plug (fixed appliances).
- Any appliances with limited access will be listed as a limitation.
